

Webany is a new kind of Content Management System. Friendly, prompt, and efficient, she helps you update your website any time from any computer. Webany is your hosted content companion.

Webany's flexible database sets her apart by allowing you to manage complex Web content using simple forms – no HTML needed.

Save time as you edit your content in one place and count on her to publish it everywhere it needs to go automatically.

Do cookie-cutter templates cramp your style? Webany's unique flexibility can handle any custom design.

Search engines got you down? Webany's easy SEO will elevate your standing.

“Just had to write to let you know what an AMAZING content management tool you have created. I'm truly impressed by how easy everything is. Just had to say thanks to your team for the great system!”

– Cameron Heinze,
Community Development Manager,
Chicago Human Rhythm Project

Under the hood

- Built on the .NET Framework 3.5 , LINQ and Lambda Queries for Tested Performance and Extensibility
- Unique database structure allowing flexible relationships among structured content
- Lightning-fast performance through server-side caching
- Rock-solid stability through dedicated application pools
- ASP.NET 3.5 Forms Authentication and custom profiles enabling employee specific security roles

Go ahead,
put her to the test.
